PRINCIPAL CHANGES

Indexation

The amounts in the source deduction table for Québec income tax have been indexed by 2.64% for 2022.

Income tax rates and income thresholds

The taxable income thresholds have been indexed for 2022. The income tax rates have not changed. The constants for adjusting the income tax rates have been indexed.

The table below shows the income tax rates, income thresholds and constants for 2022.

Income tax rates, income thresholds and constants for 2022

Taxable income		Tax rate	Constant
more than	not more than		
\$0	\$46,295	15%	\$0
\$46,295	\$92,580	20%	\$2,314
\$92,580	\$112,655	24%	\$6,017
\$112,655	—	25.75%	\$7,989

Personal tax credit amounts

The personal tax credit amounts on the *Source Deductions Return* (TP-1015.3-V) are indexed for 2022. These amounts are used to determine an individual's deduction code for the year.

The table below shows the personal tax credit amounts for 2022.

Personal tax credit amounts	2022
Basic personal amount	\$16,143
Amount transferred from one spouse to the other	\$16,143
Amount for other dependants	\$4,519
Amount for a child under 18 enrolled in post-secondary studies (per term)	\$3,101
Additional amount for a person living alone (single-parent family)	\$2,284
Amount for a severe and prolonged impairment in mental or physical functions	\$3,584
Amount for a person living alone	\$1,850
Age amount	\$3,395
Amount for retirement income	\$3,017
Reduction threshold of the age amount, the amount for a person living alone, the amount for retirement income and the amount for career extension	\$36,590

Deduction codes

The table below shows the indexed deduction code amounts for 2022.

Code	Amount (\$) for 2022	
O	None	
A	1	16,143
B	16,144	17,182
C	17,183	18,222
D	18,223	19,261
E	19,262	20,300
F	20,301	21,340
G	21,341	22,379

Code	Amount (\$) for 2022	
H	22,380	23,418
I	23,419	24,458
J	24,459	25,497
K	25,498	26,537
L	26,538	27,575
M	27,576	28,615
N	28,616	29,655

INTRODUCTION

This document contains information to help you use the source deduction table for Québec income tax. It should be used with the *Guide for Employers* (TP-1015.G-V), which contains all information concerning Québec income tax.

You can use the table to determine the amount of income tax you must withhold from remuneration you pay to an employee as an employer or to a beneficiary as a payer.

NOTE

You can use the **WebRAS** tool on our website to calculate source deductions and employer contributions.

HOW TO USE THE SOURCE DEDUCTION TABLE FOR QUÉBEC INCOME TAX

The source deduction table for Québec income tax shows the amount of Québec income tax to withhold from an individual's remuneration for a given pay period based on the individual's deduction code. It also shows the adjustment amounts to be used in certain cases.

The table consists of six schedules, which are available on our website. You must use the schedule that corresponds to your number of pay periods in the year:

- Schedule A, Québec Income Tax: 53 Pay Periods
- Schedule B, Québec Income Tax: 52 Pay Periods
- Schedule C, Québec Income Tax: 27 Pay Periods
- Schedule D, Québec Income Tax: 26 Pay Periods
- Schedule E, Québec Income Tax: 24 Pay Periods
- Schedule F, Québec Income Tax: 12 Pay Periods

Deduction codes

Use the deduction code that corresponds to the total amount of the personal tax credits entered on the *Source Deductions Return* (form TP-1015.3-V) that an individual gave you to determine the amount you have to withhold from the individual's remuneration. If the individual did not give you a copy of form TP-1015.3-V for the year, you must withhold income tax from the individual's remuneration using the deduction code for the previous year. Given that the annual indexation of the income tax system does not affect the deduction codes, individuals are not required to complete form TP-1015.3-V each year.

Deduction code "0"

You must use deduction code 0 to withhold income tax from the remuneration of an individual who entered "0" on line 10 of form TP-1015.3-V. This ensures that the personal tax credits to which the individual is entitled are not taken into account a second time in the calculation of source deductions of income tax, if the individual has already asked another employer or payer to take into account these amounts.

Exemption from source deductions of income tax respecting employment income

Do not withhold Québec income tax from the employment income of an employee who has requested an exemption on form TP-1015.3-V because the employee has estimated that the total income from all sources for the year will not exceed the total of the amounts entered on lines 10 and 19 of the form. This exemption is valid only for the year for which it is requested.

IMPORTANT

An exemption from source deductions of income tax applies only to employment income. You must not take it into account if you pay remuneration as a payer.

Adjustments

Column Y – Adjustment relating to the deduction for employment income

The source deduction table for Québec income tax takes into account the deduction for employment income. If you are paying a remuneration as a payer, the beneficiary is not entitled to the deduction. Likewise, if you are paying an employee remuneration consisting solely of taxable benefits related to former employment, the employee is not entitled to the deduction. In these cases, to ensure that the beneficiary's or employee's source deductions of income tax are not too low, add the amount of income tax provided for in column Y to the income tax you are required to withhold according to the deduction code of the beneficiary or employee.

If, according to the deduction code of the beneficiary or employee, you are not required to withhold income tax from the remuneration you pay, disregard the income tax provided for in column Y. The amount in that column is to be taken into account only if you are required to withhold income tax.

Column Z – Adjustment relating to an amount greater than the amounts covered by the deduction codes

If the amount on line 10 of form TP-1015.3-V, *Source Deductions Return*, exceeds **\$29,655**, subtract, for each additional increment of \$500 (or portion thereof), the amount provided for in column Z from the amount in column N.

Québec income tax

To determine the amount of Québec income tax to withhold from the remuneration subject to source deductions of income tax for a pay period, proceed as follows:

- Refer to the schedule corresponding to your number of pay periods in the year.
- In the "Remuneration" column, locate the bracket corresponding to the remuneration subject to source deductions of income tax for the pay period.
- Follow the line across to the right until you reach the column for the deduction code corresponding to the amount shown on line 10 of the individual's *Source Deductions Return* (form TP-1015.3-V) to determine the amount of income tax to withhold. If no amount is shown in the column, do not withhold income tax.
- Make the adjustments identified in columns Y and Z of table TP-1015.TI-V, if necessary.
- Add any additional amount the individual has asked you to withhold in form TP-1015.3-V or in form TP-1017-V, *Request to Have Additional Income Tax Withheld at Source*.
- Subtract the result of the following calculation from the income tax to be withheld: the total **tax credits** that we authorized after the individual completed form TP-1016-V, *Application for a Reduction in Source Deductions of Income Tax*, divided by the number of pay periods remaining in the year. The **deductions** that we authorized after the individual completed form TP-1016-V are taken into account in calculating the remuneration subject to source deductions of income tax.

Example 1

Henry receives a weekly salary of \$700 (52 pay periods per year), as well as \$100 per week in taxable benefits for meals and accommodation that are provided free of charge. In addition, the total contribution to an RPP and deductions to which he is entitled (entered on form TP-1015.3-V) is \$80 per pay period. The deduction code corresponding to the amount on line 10 of the form is C.

Weekly salary (52 pay periods)		\$700
Value of meals and accommodation provided free of charge (GST and QST included)	+	\$100
	=	\$800
Contribution to an RPP and deductions from line 19 of form TP-1015.3-V (calculated for the period in question)	-	\$80
Remuneration subject to source deductions of income tax	=	\$720
Source deduction of income tax per pay period		\$53.91

Example 2

Ruth is a retiree who receives a monthly pension benefit of \$4,000 (12 pay periods per year). The deduction code corresponding to the amount on line 10 of form TP-1015.3-V is E.

Monthly pension benefit (12 pay periods)		\$4,000
Remuneration subject to source deductions of income tax		\$4,000
Source deduction of income tax per pay period		\$338.00

REMUNERATION OR NUMBER OF PAY PERIODS NOT COVERED BY THE TABLE

If the remuneration amount subject to source deductions of income tax or the number of pay periods is not given in the table, you have to calculate the amount of income tax to withhold using the example below.

Example			
Jay earns a gross salary of \$4,000 per week and also receives a taxable benefit of \$200 each week. You have to withhold an RPP contribution of \$40 from Jay's remuneration each pay period. We authorize you to reduce the amount of income tax withheld by \$1,000 to take into account the tax credits Jay entered on form TP-1016-V, <i>Application for a Reduction in Source Deductions of Income Tax</i> .			
Jay completed form TP-1015.3-V, <i>Source Deductions Return</i> , for the year, entering \$21,550 on line 10 and \$1,150 on line 19.			
Remuneration subject to source deductions of income tax for the year			
Gross salary: \$4,000 × 52 pay periods		\$208,000	
Taxable benefits: \$200 × 52 pay periods	+	\$10,400	
Gross remuneration for the year	=	\$218,400	▶ \$218,400
Reduction of remuneration subject to source deductions of income tax			
Deduction for employment income		\$1,235	
Contribution to an RPP: \$40 × 52 pay periods	+	\$2,080	
Deduction entered on line 19 of form TP-1015.3-V	+	\$1,150	
	=	\$4,465	▶ \$4,465
Remuneration subject to source deductions of income tax for the year	=		\$213,935
Income tax for the year (based on the information in the "Principal changes")			
Remuneration subject to source deductions of income tax			\$213,935
Taxation rate	×	25.75%	
	=		\$55,088.26
Constant used to adjust the taxation rate ¹	-		\$7,989
Income tax for the year	=		\$47,099.26
Tax credits for the year			
Amount entered on line 10 of form TP-1015.3-V ²		\$21,550	
Lowest taxation rate for the year	×	15%	
	=	\$3,233	
Tax credits that we have authorized	+	\$1,000	
Tax credits for the year	=	\$4,233	▶ \$4,233
Income tax for the year	=		\$42,866.26
Number of pay periods in the year	÷		52
Income tax to withhold per pay period	=		\$824.35

1. The constant is used to adjust any income tax overpayments when the rates of 20%, 24% or 25.75% are applied to annual taxable income.
2. If the employee completed form TP-1015.3-V in another year, you have to adjust the amount on line 10 of the form to take indexation for the current year into account.
