

Income Averaging for Forest Producers **2021**

Complete this form if, at the end of the year, you are either:

- a certified forest producer pursuant to the *Sustainable Forest Development Act* in respect of a private forest; or
- a member of a partnership that is a certified forest producer in respect of a private forest at the end of the partnership's fiscal period ending in the year concerned.

You can request to have a portion of the net income from certified commercial activities¹ averaged:

- over a period not exceeding **seven years** if the income is from sales made before March 10, 2020;
- over a period not exceeding **ten years** if the income is from sales made after March 9, 2020.

More specifically, averaging involves:

- **deducting**, in calculating your taxable income an amount not exceeding 85% of **the lesser of \$200,000 or your net income** from certified commercial activities for the year, including your share of the net income from certified commercial activities of a partnership of which you are a member (where applicable);
- **including**, in calculating your taxable income for one or more of the seven years or the ten years following the year in which the deduction was granted, at least 10% of the amount deducted. If you can average your income from certified commercial activities over a period not exceeding seven years, you must have included the total amount deducted in your taxable income no later than the seventh year following the year in which the deduction was granted.

To qualify for the income-averaging measure, the income must have been realized in a year (or in a partnership's fiscal period) ending after **March 17, 2016**, but no later than December 31, 2025.

Moreover, you must include any portion of the amount deducted that has not yet been included, in the calculation of your taxable income for:

- the year in which you disposed of the private forest;
- the year in which you ceased to be a member of the partnership;
- the year that includes the end date of the fiscal period in which the partnership disposed of the private forest.

This measure does not affect the tax on logging operations. You must continue to include the total income generated by the sale of timber from a private forest in calculating the income for the year in which the logging operations were carried out.
