

Foreign Tax Credit

Use this form to claim a foreign tax credit for a given taxation year for an individual or a trust. The form cannot be used by a corporation.

To be entitled to the foreign tax credit, an individual (including a trust) must have been resident in Québec:

- on December 31 of the taxation year concerned;
- on the last day of residence in Canada (if the individual ceased to reside in Canada during the taxation year concerned); or
- on the date of death (if the individual died during the taxation year concerned).

“Foreign income tax” means an amount of income tax or profits tax paid to the government of a foreign country or a political subdivision of a foreign country. You can claim a tax credit only for paid, non-refundable foreign

income tax. Moreover, any taxes paid by an employee to the government of the United States under the *Federal Insurance Contributions Act* (FICA) are considered foreign income tax.

The credit is calculated differently according to whether or not the foreign income tax relates to business income. In this form, “business income” means income from an establishment located in the foreign country concerned. “Non-business income” means all other income, from a source located in the foreign country on which you paid income tax to that country.

Enclose a duly completed copy of this form with your income tax return (or that of the trust). Complete a copy of the form **for each foreign country** to which you paid income tax and enclose the relevant supporting documents. The information provided on the form must apply only to the country concerned.

	Social insurance number (individual)	Identification number (trust)	Taxation year
01		02	03
04	Last name and first name of individual or name of trust		
05	Name of foreign country		

The line numbers in parentheses below refer to the personal income tax return, unless otherwise indicated.
